TYPO3.Neos - Bug # 54355

Status:	Closed	**Priority:**	Should have
Author:	Thorsten Vallender	**Category:**	
Created:	2013-12-12	**Assigned To:**	
Updated:	2014-10-02	**Due date:**	
Subject:	rename Name(URL) is not working properly		
Description			

Hallo,

in the page Inspector when i change the Name(URL) and press "Apply"
the "Publish" button displays a incorrect sum.

For example in the TYPO3 Neos Demo Site:
Change the Name(Url) from the page "Multi columns" from "multiple-columns" to "multiple-columns12",
the publish button shows (26) and the "Publish all" shows (28).
When I press the button "Publish(26)" the following error is displayed:

"Server communication error, reload the page to return to a safe state if another publish does not work"
"ExtDirect error: Uncaught exception #0 - A detached entity was found during removed
TYPO3\TYPO3CR\Domain\Model\NodeData@0000000009d63df6000000004d7e9473"
"Server communication error, reload the page to return to a safe state if another publish does not work"
"ExtDirect error: Uncaught exception #0 - A detached entity was found during removed
TYPO3\TYPO3CR\Domain\Model\NodeData@0000000009d63df7000000004d7e9473"

etc ...

But if I press the button "Publish all(28)", then it works without problems;
or I press the button "Publish(10)" again.

- Status changed from New to Accepted

 Interesting, we will try to reproduce that. I have an idea why it could happen but need to try first.
