# TYPO3.Neos - Bug # 54379

| | | | |
|---|---|---|---|
| **Status:** | Resolved | **Priority:** | Must have |
| **Author:** | Christopher Hlubek | **Category:** | |
| **Created:** | 2013-12-13 | **Assigned To:** | |
| **Updated:** | 2013-12-13 | **Due date:** | |
| **Subject:** | Linking to the a page without workspace fails when reloading the page in the backend | | |
| **Description** | | | |

When clicking a link to page without the workspace identifier in the backend, a JS error occurs:

    Uncaught TypeError: Cannot read property 'getSubject' of undefined

This is caused by the missing document metadata in the response.

I would expect an error notification and staying on the same page.

## Associated revisions

**Revision 0efc5250 - 2013-12-13 19:44 - Christopher Hlubek**

[BUGFIX] Handle inline loading of pages without metadata correctly

Check the response for the page metainformation and show an error with
explanation. This can be improved by adding a link to the error message
that opens the requested location in a new tab in a follow-up.

**History**

**#1 - 2013-12-13 13:33 - Bastian Waidelich**

Where are links without context rendered in the backend? Isn't that the issue?

**#2 - 2013-12-13 14:06 - Christopher Hlubek**

The logo on the Neos demo site is linked hard to the root page.

And yes, it should be linked correctly, but we should handle that error gracefully.
