Subject:	Upload of non-image results in Catchable Fatal Error		

Description

Hi!

I get a Catchable Fatal Error in Neos 1.0, when uploading a non-image file in the Media Manager (/neos/management/media). See attached file for full debug info.

> #1: Catchable Fatal Error: Argument 1 passed to TYPO3\Media\ViewHelpers\ImageViewHelper_Original::render() must implement interface TYPO3\Media\Domain\Model\ImageInterface, instance of TYPO3\Media\Domain\Model\Asset given in /Volumes/Data/Users/mathias/ApacheSites/oksval2.net.local/Data/Temporary/Development/Cache/Code/Flow_Object_Classes/TYPO3_M /TYPO3_Media_ViewHelpers_ImageViewHelper.php line 104

I tested with a Word file called "test.doc". Uploading a JPEG file works fine.

[BUGFIX] Upload of non-image results in Catchable Fatal Error

Uploading a non-image asset into the media manager results in a fatal
error as the ImageViewHelper only processes assets implementing the
ImageInterface.

This change adds default icons for common file extensions and uses
a default fallback icon if no matching icon is found.
