Subject:	[Neos BE] - HTML editor issue in Firefox		
Description			

Typo3 Neos 1.0.0 Installation,
Browser: Firefox 25.0.1

In the BE when you add a new HTML node and you press "Edit HTML" (on the right side) a part of the HTML editor is hidden.
I figured out that the rule "padding-right: 320px;" of the class ".neos .neos-secondary-inspector" hides a part of the HTML editor and
puts it outside the screen on the left side.
If I disable the rule the editor is fine.

[BUGFIX] Secondary inspector is rendered outside viewport in FF

The secondary inspector opens from the right to the left using a
transition, but in Firefox the left positioning is incorrect so it
animates to a position which is outside the viewport.

This patch changes the animation to be done on the left css property
to make it less error prone.
