**Description**

After latest commit: https://github.com/TYPO3/TYPO3.CMS/commit/6eb7a548125a945316f8ad32eb3e5481a28ae2d6 fontend is broken. I have the following error message:

PHP Fatal error:  Class 'TYPO3\\CMS\\Frontend\\ContentObject\\ContentObject' not found in /web/typo3_src/typo3/sysext/core/Classes/Utility/GeneralUtility.php on line 4171, referer: http://domain.com/

[BUGFIX] Fix side effect for new class instantiation

With commit 6eb7a54 performance optimized class instantiation code has been committed. This code removed the side effect of a reflection exception being thrown when a not existing class is instantiated.

Code in ContentObjectRenderer relied on this side effect, so we have to fix that and properly test if the class exists instead.

Additionally this change adds some more comments to the new instantiation code that has been forgotten in the last commit.

Resolves: #54425
Releases: 6.2

## History

**#1 - 2013-12-15 11:42 - Markus Klein**

That class does not exist. Did you copy the complete error message? What is the complete stack trace?

**#2 - 2013-12-15 13:02 - Marcin Sągol**

Hi Markus,

i just cut off some long paths from this message, they are not important here:

[Sun Dec 15 12:57:00 2013] [warn] [client 127.0.0.1] mod_fcgid: stderr: PHP Fatal error:  Class
'TYPO3\\CMS\\Frontend\\ContentObject\\ContentObject' not found in
/var/www/clients/client1/web8/web/typo3_src/typo3/sysext/core/Classes/Utility/GeneralUtility.php on line 4171, referer: http://domain.com

The sam error message shows up if i open frontpage or any other.

If i apply this commit i have only blank white page on frontend, and this one entry in server error.log

If if remove this last commit (git reset --hard HEAD^1) T3 works just fine.

**#3 - 2013-12-15 18:40 - Tobias Liegl**

I get the same error message with latest master - but only on pages with an image element. And only if the image orientation is not the standard
centered one.
