

## TYPO3.Flow - Bug # 54451

<b>Status:</b>	New	<b>Priority:</b>	Must have
<b>Author:</b>	bitloft GmbH	<b>Category:</b>	
<b>Created:</b>	2013-12-16	<b>Assigned To:</b>	
<b>Updated:</b>	2014-01-01	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b> (any)			
<b>Subject:</b>	No functionality at Apache environments with suexec		
<b>Description</b>			
<p>We've figured out that TYPO3 Flow/Neos can't be used out of the box in Apache environments which are using suexec. Suexec only accepts "whitelisted" environment variables like variables with "HTTP_" prefix. That means that TYPO3 Flow can't access the main environment variable FLOW_REWRITEURL (setted in Web/.htaccess), which means that "index.php" is prepending at each URL (Package/Controller/Action) and the right functionality is not given. We've found a way to avoid the problem and added "putenv('FLOW_REWRITEURLS=1');" to line 1 in Web/index.php, its kindly but not clean.</p> <p>There is a bug report (status: new, since 4 years) at the apache bugzilla site which describes the same thing: <a href="https://issues.apache.org/bugzilla/show_bug.cgi?id=46644">https://issues.apache.org/bugzilla/show_bug.cgi?id=46644</a></p>
