[BUGFIX] Respect X-Forwarded-Proto header consistently

The `HttpRequest` currently only considers `X-Forwarded-Proto` headers in its `isSecure()` method.

With this change the header is checked in the constructor so that it overrules the requested protocol if set.

Before::

```
GET http://acme.com:8080 HTTP/1.1
X-Forwarded-Proto: https
X-Forwarded-Port: 443
```

Generated URIs like `http://acme.com:8080`. With this change the result is `https://acme.com`.
