Subject:	"Paste After" icon spinning forever		
Description	<p>Within a test-installation of TYPO3 Neos 1.0 from launchr.com I encountered the following bug.</p> <p>What I did using the admin backend:</p> <ol style="list-style-type: none">1. I added a new page to my site.2. I added some new text sections and a headline.3. The I tried to move one of the text sections below another one to simply change their order of appearance on screen.4. I clicked into the text section that I wanted to move.5. I clicked the "Cut" icon (text section's utility-zone in upper right corner) for the first text section.6. I clicked into the text section that was intended to precede the text section from step 4.7. I clicked the "Paste After" icon (text section's utility-zone in upper right corner) for text section from step 6. <p>The "Paste After" icon changed into a spinning circle of rays and kept spinning endlessly (see attached screenshot). The edit view of the page did not refresh.</p> <p><i>In case this bug is not reproducible: There might be a side effect from renaming that new page's title and URL after step 2 and not refreshing the tree view in "Navigate" to the left.</i></p>		

History

#1 - 2013-12-18 09:18 - Chr is

- Tracker changed from Impediment to Bug
- Project changed from Base Distribution to TYPO3.Neos
- Category deleted (Content Editing)

Moved to proper project section.

#2 - 2014-02-04 16:22 - Adrian Förder

just pasting my notes here because I had the same issue:

Moving resp. Cut/Paste doesn't stop the ajax load icon

When cutting a node and pasting it somewhere else, the paste icon transforms into a ajax load icon, while

POST http://dev.internal.acme.com/@user-aföeder?TYPO3_ExtJS_ExtDirectRequest=1&__csrfToken=a597fc383484418c8a1ff59fb1acf95c

```
{"action":"TYPO3_Neos_Service_ExtDirect_V1_Controller_NodeController","method":"move","data":["/sites/content/main/text1@user-aföeder", "/sites/content/main/node52f1002471035/column0/node52f0fb6746a46@user-aföeder","after"],"type":"rpc","tid":5}
```

is sent, replied with a 200 OK

```
{"type":"rpc","tid":5,"action":"TYPO3_Neos_Service_ExtDirect_V1_Controller_NodeController","method":"move","result":{"data":{"newNodePat":"\sites\content\main\node52f1002471035\column0\text1@user-aföeder"},"success":true}}
```

but the ajax load icon doesn't stop (and the newly created content isn't injected, which is not that important IMO)

#3 - 2014-10-02 13:32 - Jonas Renggli

- Status changed from New to Closed

Can't reproduce this in Neos 1.1.2

If the problem still exists please open an issue on <https://jira.typo3.org/>
