<b>Complexity:</b>			
<b>Affected Flow version:</b> Git master			
<b>Subject:</b>	Web/.htaccess will be overridden on every composer update/install		
<b>Description</b>			
<p>As the title says, on every composer update/install Web/.htaccess will be copied from somewhere inside the Flow package and overrides the local file.</p> <p>It's good to have this copy the first time one installs Flow, but after one has added own stuff like RedirectRules e.g. the override is really annoying.</p>

[BUGFIX] .htaccess is overwritten by the composer install scripts

The composer update / install scripts overwrite the Web/.htaccess file which is unwanted behavior as this leads to issues when people add custom rewrite rules, or if for example setting the MultiViews option is not allowed.

This change moves the .htaccess, index.php and flow scripts to the Defaults folder so it will only be initially placed into the installation.
