Affected Flow version: Git master			
Subject: Indentation in Settings.yaml.example is confusing			
Description			
<p>The following indentation was found to be confusing by people in #typo3-neos:</p> <pre># You might need to uncomment the following lines and specify # the location of the PHP binary manually. # core: # phpBinaryPathAndFilename: 'C:/path/to/php.exe'</pre> <p>During the removal of the indentation the mistake was made to remove the full ' #' before the line which lead to having the settings on the wrong level. The following was found to be more clear:</p> <pre># You might need to uncomment the following lines and specify # the location of the PHP binary manually. # core: # phpBinaryPathAndFilename: 'C:/path/to/php.exe'</pre>
