Subject:	Add link to the resource to the edit view		
Description	<p>In the edit view of an image you can right click the image in the preview to get the actual public link to the resource. If a thumbnail for an asset is generated (like for a word file for example) this is not possible. There should at least be a way to find the actual link to a resource from the media manager interface.</p>

[TASK] Add a direct link to the asset in the edit view

This change adds a link to the name of the resource in the edit view so it's possible to copy the direct url to the resource from within the media manager.
