Sprint Focus:			
Subject:	Deprecate / remove global FILEMOUNTS variable		
Description			
<p>As far as I can see the filemounts of a user are currently loaded on every request in the Backend, see /typo3/init.php:</p> <pre>\TYPO3\CMS\Core\Core\Bootstrap::getInstance() ... ->initializeBackendUserMounts() ...</pre> <p>I think it would be better to simply use BackendUserAuthentication->getFileStorages() which loads the storages whenever they are required.</p> <p>What do you think? What would be the procedure of deprecating the global variables?</p>

History

#1 - 2014-11-04 00:02 - Markus Klein

What's the status here?

AFAIK the global FILEMOUNTS is gone, but the WEBMOUNTS are still there.

#2 - 2015-01-01 00:23 - Benjamin Mack

- Status changed from New to Resolved

FILEMOUNTS is removed from the core.
