Subject: Uncaught Exception in Flow while deleting package TYPO3.NeosDemoTypo3Org

Description

During Neos installation, I imported the Demo Site TYPO3.NeosDemoTypo3Org.

After that I created a new site.

Then I deleted the Demo Site TYPO3.NeosDemoTypo3Org in "Site Management".

Then I opened "Package Management" and scrolled down the list to the very end.

There still was a package TYPO3.NeosDemoTypo3Org - so I deleted it.

This is what I got the next moment:

```

Seems the bug was resolved in the meantime. Couldn't reproduce it with current master.
