TYPO3.Neos - Bug # 54585

Status:	Closed	**Priority:**	Should have
Author:	Chr is	**Category:**	
Created:	2013-12-23	**Assigned To:**	
Updated:	2014-10-01	**Due date:**	
Subject:	Two column content element does not render columns side by side		
Description			

The "Two column content" Element does not render the columns side by side.

They are just displayed one after another - like normal paragraphs.

PS: The rendering of that element was mentioned in an earlier bug:

Hey Chr, is this happening in the demo site or in your own site? As Neos does not set any css property for your frontend. This means that you should add styling to your own website for rendering the columns side by side.

#2 - 2013-12-25 02:01 - Chr is

The rendering issue I described occurs in my **own site** and both in **frontend and backend**.

From my first encounter with the "Two column content" element I got the impression that it works OOTB (i.e. already shipped with the appropriate CSS).

Did I miss a conceptual clue here?

Hey Chr is

By default Neos sets some classes to the elements, e.g. "columns-4-4-4". It's your turn to define some css styles for these classes.

If you're working with Twitter Bootstrap please have a look at the Demo Site Package https://git.typo3.org/Packages/NeosDemoTypo3Org.git provided with the Base Distribution. There the multi columns work. And create code like

```
1<div class="row typo3-neos-nodetypes-threecolumn">
2   <div class="col-sm-4">
3       <!-- column 1 -->
4   </div>
5   <div class="col-sm-4">
6       <!-- column 2 -->
7   </div>
```

```
 8    <div class="col-sm-4">
 9        <!-- column 3 -->
10    </div>
11</div>
```
