

TYPO3.Flow - Bug # 54589

Status:	New	Priority:	Should have
Author:	Andreas Wolf	Category:	Security
Created:	2013-12-24	Assigned To:	
Updated:	2013-12-24	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: (any)			
Subject:	Role parent is not removed from roles MM table		
Description			
<p>When removing a parent role from Policy.yaml, this change is not reflected in the table <code>typo3_flow_security_policy_role_parentroles_join</code> if there are no parent roles for this role anymore.</p>			
<p>How to test:</p>			
<ol style="list-style-type: none">1. Add a role with two parent roles to the table, run some action2. check <code>typo3_flow_security_policy_role_parentroles_join</code> for the inheritance: there should be two entries in it3. remove one of the parent roles, run some action4. check <code>typo3_flow_security_policy_role_parentroles_join</code>: one entry should have gone5. remove the other parent role, run some action6. check <code>typo3_flow_security_policy_role_parentroles_join</code>: the entry is still there, but should be gone.			
<p>Note: the affected Flow version is 2.1, but I cannot select this because the entry is missing.</p>
