TYPO3.Neos - Bug # 54670

Status:	Resolved		**Priority:**	Must have
Author:	Chr is		**Category:**	
Created:	2014-01-01		**Assigned To:**	Christian Müller
Updated:	2014-03-03		**Due date:**	
Subject:	"Create tag" raises error message: An error occurred while trying to call TYPO3\Media\Controller\AssetController->createTagAction()			
Description				

After uploading an image (abcxyz.png) via **Neos backend GUI -> Management -> Media** I tried to create a tag.

After pressing the "*Create tag*" Button I get an orange Error Message from Neos backend GUI:

An error occurred while trying to call TYPO3\Media\Controller\AssetController->createTagAction()

This happens with a fresh installation of Neos 1.0.1 with an new site OOTB.

Hi, had the same issue.

Problem is: you have to type in a tag where it says "Enter tag label" and then hit "Create tag". After that you can drag the image on the tags you want or check the boxes in the single view.

#3 - 2014-02-20 21:57 - Chr is

You are right, Gregor!

But this should be intercepted by Neos.

<WARNING: Wild guessing following...>

Packages/Application/TYPO3.Media/Classes/TYPO3/Media/Controller/AssetController.php

...has...

public function createTagAction($label)

...annotated with...

```
* @Flow\Validate(argumentName="label", type="NotEmpty")
```

...assuring label field not being empty.

But if no tag is supplied the resulting error is not handled anywhere.

I read sth. about **Flow Validation**.

An adopted version of this snippet....

```
<f:form.validationResults for="label">
  <f:if condition="{validationResults.flattenedErrors}">
    <f:for each="{validationResults.flattenedErrors}" key="propertyPath" as="errors">
      <p>{propertyPath}</p>
      <f:for each="{errors}" as="error">
        <li>{error -> f:translate(key: error.code, arguments: error.arguments, package: 'TYPO3.Flow', source: 'ValidationErrors')}</li>
      </f:for>
    </f:for>
  </f:if>
</f:form.validationResults>
```

...might help somewhere in

```
Packages/Application/TYPO3.Media/Resources/Private/Templates/Asset/Index.html
```

Too bad my coding mojo is not strong enough to sort this out... :-(
