Subject:	Online Documentation lacks files and paths for mentioned code snippets		

Description

There are multiple places where online documentation is **lacking file paths** that the mentioned code samples have to be added to - or modified in.

E.g. this page ...

http://docs.typo3.org/neos/TYPO3NeosDocumentation/IntegratorGuide/PageRendering.html#page-rendering

... lacks the file and path where the mentioned code snippet ...

```
page = Page
page.body.templatePath = 'resource://My.Package/Private/Templates/PageTemplate.html'
```

... should live from now on.

This is especially annoying for Newbies that are not yet familiar with the central files as they have to look for another information elsewhere.
And opening multiple browser tabs just to have every recursively structured subpage of needed documentation in sight is not very ergnonomic.
