

TYPO3.Neos - Bug # 54746

Status:	Closed	Priority:	Should have
Author:	Kay Strobach	Category:	
Created:	2014-01-05	Assigned To:	Hubertus Golf
Updated:	2014-10-01	Due date:	
Subject:	.htaccess should not comment FLOW_CONTEXT Production		
Description			
for normal people the FLOW_CONTEXT Production in the .htaccess should be enabled by default. Developers can switch it off ... but for the first the performance seems to be poor, with this option enabled ;)			

History

#1 - 2014-03-19 14:39 - Simon Schaufelberger

documentation is about setting the context in apache server config.

My opinion: For Flow the "normal people" are developers. For Neos I agree to your suggestion and there the default context is production already.
