<b>TYPO3 Version:</b>	6.2		
<b>PHP Version:</b>			
<b>Complexity:</b>			
<b>Is Regression:</b>	No		
<b>Sprint Focus:</b>			
<b>Subject:</b>	TemplateService runs processIncludes twice when TypoScript is not in cache		
<b>Description</b>			
<b>TYPO3\CMS\Core\TypoScript\TemplateService</b>			
<p>-&gt;processIncludes() is run "mandatory" from the stack -&gt;start() -&gt;runThroughTemplates() and doing all the work that needs to be done.</p> <p>However if there is no entry in the caching framework for the parsed (transformed into array) TypoScript then -&gt;processIncludes() is run a second time from within -&gt;generateConfig(). The TypoScript does not change (except one extra LF added into each Template with an &lt;INCLUDE_TYPOSCRIPT instruction). There is no reason to call processIncludes() a second time.</p>			
<b>How to check/reproduce</b>			
<ul style="list-style-type: none"><li>- See the difference in lineNumbers in TypoScript-Object-Browser and Template-Analyzer in BE. You get 1 line offset per template that has an INCLUDE_TYPOSCRIPT instruction.</li><li>- Put a debug statement inside of processIncludes() and check the frontend in cached / non-cached states and see that it is run twice after the cache has been cleared in BE. If you compare substr_count(\$value, LF); <b>before</b> and <b>after</b> checkIncludeLines() is called inside processIncludes() you will find: On <b>first</b> run INCLUDE_TYPOSCRIPT is executed and line numbers are different, which makes perfect sense. When the TS is <b>not</b> found in the cache and processIncludes() is executed the <b>second</b> time for some very weird reason line numbers are +1 if the template has an INCLUDE_TYPOSCRIPT (that was already processed). The TypoScript itself is exactly the same, except for this extra empty line, which won't be part of the hash-calculation and gone again on the next page-cycle (when the TS is found in cache).</li></ul>

Revision cbbc7853 - 2014-04-12 01:30 - Peter Niederlag

[BUGFIX] Don't run processIncludes more than once

processIncludes() is run "mandatory" from the stack ~~>start()~~  
>runThroughTemplates() and doing all the work that needs to be done.
