Subject:	swap workspace won't reset t3ver_wsid		

Description

This is an followup problem to #37065 and change set commit:a81a5816cf94ed873978d85dad25f6a3b7823b74. This patch introduced an new check to the t3ver_wsid (line 1102). But this field is not always set to the right workspace.

For example if you create new content in the workspace and the choose the mass action "swap", TYPO3 will not set the t3ver_wsid to 0. See attached screenshots for the db status.

The result is: In live version everything looks good, but all the swapped content disappears in the workspace preview.

- Status changed from New to Needs Feedback

Thanks for your report. However, the change you mentioned (frontend preview) does not seem to be related to the problem of not setting/modifying "t3ver_wsid" in the backend.
Besides that, the records in the screenshots you provided do not look like having been processed at all with a swap/publish command in the backend.

I've been working on functional test cases the last few weeks for workspaces - thus, your scenario could be part of those tests as well - especially the edge cases are interesting here.

So, can you please give some more information what you did and maybe which warning/errors have been shown (see Admin Log in the backend as well).
Does the problem occur only in TYPO3 4.5 or can you reproduce that in the current master (TYPO3 6.2 LTS development) as well?
Thanks in advance for your feedback!

- File v6.2.3-before.png added

- File v6.2.3-after-swap.png added

Hi Oliver,

i now tested this issue on an clean (Intropackage) 4.5.34 and on the latest 6.2.3 and still can reproduce this error. I found this issue because we use the "Swap content" of the workspace module a lot and after updating to an T3 Version which includes change set commit:a81a5816cf94ed873978d85dad25f6a3b7823b74 a lot of duplicate Content-Element appeared in the frontend. In the change T3 introduce an an new condition which checks the t3ver_wsid.

Here is what i did:

1.) Install T3

2.) Create workspace

3.) Create new page in the workspace http://forge.typo3.org/attachments/26885/v6.2.3-before.png

4.) Go to the Workspace module and choose "Mass action"->SWAP.

5.) after you swap the versions in the DB the t3ver_wsid is still 1 http://forge.typo3.org/attachments/26886/v6.2.3-after-swap.png

Please let me know if i can help you with this issue.

#5 - 2014-06-17 16:27 - Oliver Hader

- Parent task changed from #54853 to #58284

#6 - 2014-06-17 16:28 - Oliver Hader

Alright & thanks, I moved the issue to the current workpackage and will have a look soon (with some functional tests for that scenario)

#7 - 2014-06-17 16:32 - Oliver Hader

- TYPO3 Version changed from 4.5 to 6.2

By looking to the SQL data, it looks correct since "swapping" just switches live versions with workspace versions. For the "publish" task (one-way) the t3ver_* fields are cleared...
However, the "swap" action is still missing in the functional test cases, there's currently only "modify", "publish" (single record) and "publishAll" (whole workspace)

#8 - 2014-09-25 11:21 - Michael Voehringer

Hi Oliver,

ok, if the SQL data is correct then there must be an bug in the SQL-query. If you can have a look at the changeset form ticket #37065 (https://forge.typo3.org/projects/typo3cms-core/repository/revisions/a81a5816cf94ed873978d85dad25f6a3b7823b74/diff/typo3/sysext/frontend/Classe /Page/PageRepository.php) on line 878 -880 there where an new condition added which filters out the swapped records when you are in an workspace.

Maybe we should change the title of this bug?

#9 - 2014-12-19 08:52 - Alexander Opitz

- Status changed from Needs Feedback to New

#10 - 2015-01-23 11:33 - Mathias Schreiber

- Target version set to 7.5
