Subject:	mod_rewrite doesnt allow uppercase characters for the session id

Description

The usage of the SecurityPublishingConfiguration in combination with the fluid resource viewhelper generates a link which includes the users sessions id. This session id includes uppercase characters. The mod_rewrite rule for this private resources doesnt allow uppercase characters for the session id, so the user gets a 404.

Example:

    $myNewResource->getOriginalResource()->setPublishingConfiguration($this->resourceService->getSecurityPublishingConfiguration());

And now use the fluid resource viewhelper.
The output looks like this

[BUGFIX] Allow uppercase rewrite regex expression for session id

The usage of the SecurityPublishingConfiguration in combination with
the fluid resource viewhelper generates a link which includes the
users sessions id. This session id includes uppercase characters.
The mod_rewrite rule for this private resources doesnt allow uppercase
characters for the session id, so the user gets a 404.
