Sprint Focus:			
Subject:	FrontendContentAdapterService should disabled for new installations.		
Description	<p>The FrontendAdapaterservice is a backwardscompatibility layer for TYPOScript which expects data to be present in the old ways.</p> <p>This Service is very slow and should be disabled on new installations by default.</p>

[TASK] Allow FrontendContentAdapter to be disabled

The FrontendContentAdapter transforms tt_content and pages records within cObject to the format which they have been stored in in pre 6.x installations, so probably existing legacy TYPOScript config can deal with the same data.

This patchset introduces an AllConfiguration flag allowing to disable that service. For new installations the service is disabled by default, upgrading installations have the service enabled.

Resolves: #54979

Releases: 6.2

If this is such a big performance killer, is there any documentation as to how I have to adapt my typoscript to be able set [FE][activateContentAdapter]=0 in migrated installations?
