**Sprint Focus:** 

Subject: WP: Overall System Performance (Backend and Frontend)

#### Description

TYPO3 6.2 LTS will be used in enterprise environments as well as on budget hosting-environments. These systems will have a lot of content or many requests or even both.

In order to provide the necessary technical basis for those use cases, the overall performance of TYPO3 CMS must be in-creased. Also, the main performance of TYPO3 will be reviewed and optimized to get a faster system.
