Core - Epic # 55067

Epic # 55070 (Accepted): Workpackages

Status:	New	**Priority:**	Should have
Author:	Ingo Schmitt	**Category:**	
Created:	2014-01-16	**Assigned To:**	Benjamin Mack
Updated:	2015-02-11	**Due date:**	

Sprint Focus:			
Subject:	WP Responsive Distribution		

Description
The goal is to have a finished installation that can be brought into an official "package" shipped with 6.2 final. The introduction package is a show-off of the common features of TYPO3 CMS, also best practices for TypoScript and plugin configuration.It should be a simple introduction for users of the feel of the CMS.

Subtasks:	
Story # 55581: Frontend-specific features	**Resolved**
Story # 55582: Best Practices for BE editors	**Resolved**
Story # 55583: Valid frontend output / image licenses	**Resolved**
Story # 55584: T3D Export for Introduction Content	**Resolved**
Story # 55585: Download / Installation of Introduction Package	**Resolved**
Story # 55586: Documentation	**New**
Task # 57212: Add single view for distributions in EM	**Resolved**

History

#1 - 2014-01-16 16:16 - Ingo Schmitt

- Estimated time set to 80.00

#2 - 2014-01-16 16:18 - Ingo Schmitt

- Parent task set to #55070

#3 - 2014-02-02 12:21 - Benjamin Mack

Another topics after the discussion with Benjamin

- Form Extension still has Bugs

- Data Provider for TS files should go in the core - see https://github.com/georgringer/belayout_fileprovider

- Add new Content Elemente is done via itemProcFunc - should be easier for re-ordering

- Constant Editor: Check and then remove CE Table Constants

- Content: Check images

- Content: We need Design Elements for the Language Switch
