Core - Bug # 55117

Status:	Closed	**Priority:**	Should have
Author:	Michael Schams	**Category:**	Backend User Interface
Created:	2014-01-18	**Assigned To:**	
Updated:	2014-12-06	**Due date:**	
TYPO3 Version:	6.2		
PHP Version:	5.4		
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	Exception on first access to HELP -> About TYPO3 CMS		

Description

In a fresh, clean **TYPO3 CMS 6.2 LTS beta4** instance, when you access "About TYPO3 CMS" in module "Help", an exception occurs: "File /Object/ does not exist.", see attached screenshot.

When you click "About TYPO3 CMS" again, the proper "About TYPO3" page appears correctly and from then on, no further exceptions. I could not manage to get the exception again, even after clearing caches (all caches, page content cache and configuration cache) and deleting all files under typo3temp (recursively).

The issue is reproducible: install a new TYPO3 CMS 6.2 LTS beta4 instance, go to the backend and access "About TYPO3 CMS" the first time.

I did not note the exception number - I will add this as a note, the next time I come across this.

History

#1 - 2014-01-20 10:56 - Michael Schams

Exception number is: **1314516809** - http://wiki.typo3.org/Exception/CMS/1314516809

Which appears in file typo3/sysext/core/Classes/Resource/Driver/LocalDriver.php twice:

method **getFileInfoByIdentifier()** - line 238
method **getFolderInfoByIdentifier()** - line 256

#2 - 2014-02-02 00:07 - Michael Schams

Looks good with current master (last commit: 06bf27df49a2ae3b1de49e64169139ac5c449681).
No problems after a deploying a fresh copy. Please see related Bug #55160.

#3 - 2014-02-02 12:40 - Michael Schams

Please **CLOSE** this ticket (issue is already fixed in current master, see related ticket #55160).

#4 - 2014-12-06 14:17 - Mathias Schreiber
