

TYPO3.Fluid - Bug # 5512

Status:	Resolved	Priority:	Could have
Author:	Bastian Waidelich	Category:	ViewHelpers
Created:	2009-11-26	Assigned To:	Bastian Waidelich
Updated:	2010-10-20	Due date:	
Has patch:			
Affected Flow version:			
Subject:	form view helper produces invalid XHTML output		
Description			
<p>By default the form view helper inserts hidden fields for referrer & hmac to the generated form at the very top. I just found out, that this is not XHTML compliant as In XHTML 1.0 Strict mode all inputs have to be put in a block element.</p> <p>I'd suggest to wrap the auto-generated hidden fields by</p> <pre><div style="display: none"></div></pre>

[+BUGFIX] Fluid (ViewHelpers): FormViewHelper wraps hidden fields with a div tag to create XHTML valid output. This fixes #5512

History

#1 - 2009-11-26 15:13 - Bastian Waidelich

- File *5512_form_view_helper_produces_invalid_XHTML_output.patch* added
- Assigned To set to Sebastian Kurfuerst

@Sebastian: could you please verify the attached patch and commit if ok?

#2 - 2009-11-26 15:37 - Bastian Waidelich

- File *5512_form_view_helper_produces_invalid_XHTML_output_v2.patch* added

new version with tweaked output (new lines)

#3 - 2009-11-26 15:39 - Bastian Waidelich

Mh.. another XHTML compatibility issue:

in XHTML 1.0 Strict it's not allowed to set the "name" attribute of the form tag. The problem is: Fluid relies on the name attribute..

#4 - 2009-12-16 14:16 - Thomas Deinhamer

I'd use a fieldset element instead of a div element, seems to me more "native".

#5 - 2010-03-15 16:29 - Sebastian Kurfuerst

- Status changed from New to Needs Feedback
- Assigned To deleted (Sebastian Kurfuerst)
- Priority changed from Must have to Could have

We need to discuss this issue, as I somehow have a bad gut feeling when the <f:form> adds markup like "div".

I don't know.. It already does add additional HTML, which I don't really like. But there is no way around that yet* - so at least they should be added in a (X)HTML compliant way in my opinion.

btw: I'm reassigning this to you so you get notified ;)

- In FLOW3 there will be a request stack that might make this "hidden field magic" unnecessary. Do you remember if something like this planned too for extbase?

#7 - 2010-06-18 10:12 - Sebastian Kurfuerst
