| Subject: | Exception on first access to FILE -> Filelist | | |
| Description | <p>In a fresh, clean TYPO3 CMS 6.2 LTS beta4 instance, when you access "Filelist" in module "FILE", an exception occurs: "File /Object/ does not exist." (in page tree and in content frame), see attached screenshot.</p> <p>When you click "Filelist" again, the proper "content" appears in the content frame, exception remains in page tree. You only get this the <u>first time</u> you access these functions. Not again after that, even after clearing caches (all caches, page content cache and configuration cache) and deleting all files under typo3temp (recursively).</p> <p>But the issue is reproducible: install a new TYPO3 CMS 6.2 LTS beta4 instance, go to the backend and do same steps as described above.</p> <p>Exception number is: 1314516809 - http://wiki.typo3.org/Exception/CMS/1314516809</p> <p>Which appears in file typo3/sysex/core/Classes/Resource/Driver/LocalDriver.php twice:</p> <p>method getFileInfoByIdentifier() - line 238 method getFolderInfoByIdentifier() - line 256</p> <p>This issue is related to ticket #55117 (same exception).</p> | | |

History

#1 - 2014-01-20 11:27 - Michael Schams

- File screenshot0009.png added

screenshot attached.

#2 - 2014-01-20 12:42 - Markus Klein

- Category changed from Backend User Interface to File Abstraction Layer (FAL)

#3 - 2014-01-31 12:56 - Ingo Schmitt

- File Bildschirmfoto_2014-01-31_um_12.55.46.png added

- Priority changed from *Should have* to *Must have*
- Target version set to 6.2.0

Can reproduce in fresh install.

#4 - 2014-01-31 12:57 - Ingo Schmitt

- Status changed from *New* to *Accepted*

#5 - 2014-01-31 12:59 - Ingo Schmitt

As discussed with Steffen, possible error in

```
8 TYPO3\CMS\Core\Resource\Driver\LocalDriver::getFolderInfoByIdentifier(TYPO3\CMS\Core\Resource\Folder)
```

```
/server/data/www/apache/core-test/typo3/sysex/core/Classes/Resource/ResourceStorage.php:
```

```
02392: $processingFolder = $this->createFolder($processingFolder);
02393: }
02394: $data = $this->driver->getFolderInfoByIdentifier($processingFolder);
02395: $this->processingFolder = ResourceFactory::getInstance()->createFolderObject($this, $data['identifier'], $data['name']);
02396: }
```

There should be a `getIdentifierByProcessingFolder`

#6 - 2014-01-31 12:59 - Ingo Schmitt

- Parent task set to #54229

#7 - 2014-01-31 13:00 - Ingo Schmitt

- Assigned To set to Steffen Ritter

#8 - 2014-01-31 14:08 - Ingo Schmitt

- Status changed from *Accepted* to *Needs Feedback*
- Assigned To deleted (Steffen Ritter)
- Priority changed from *Must have* to *Should have*

Can reproduce with current master

#9 - 2014-01-31 14:09 - Ingo Schmitt

Could you please check, if the problem still exists with the current master of 6.2?

#10 - 2014-02-02 00:05 - Michael Schams

Looks good with current master (last commit: 06bf27df49a2ae3b1de49e64169139ac5c449681).
No problems after a deploying a fresh copy.

#11 - 2014-02-02 10:27 - Ingo Schmitt

- Status changed from *Needs Feedback* to *Closed*

Is already fixed in current Master

#12 - 2014-02-18 14:54 - Steffen Ritter

- % Done changed from 0 to 100

#13 - 2014-02-20 17:14 - Steffen Ritter

- Parent task changed from #54229 to #54264
