[TASK] Add possibility to resolve a default storage

Before FAL a default upload folder has been retrieved by setting `$GLOBALS['TYPO3_CONF_VARS']['BE']['fileadminDir'] . 'user_upload'`. With FAL this even could be placed on a remote system. Furthermore we do not want users to fiddle around with path like that anymore.

Each Storage already provides "getDefaultFolder" meant for uploads. But still, if there are several storages, there is no way to figure out which storage should be the default one for uploads, if it is legacy code or just not configurable.

This patch introduces the concept of a default storage as a flag which can be set within the storage record. The automatic creation of /fileadmin/ - storage will have this flag already set.

Resolves: #55177

Releases: 6.2
