[FEATURE] Add maximumRecords evaluation for TCA type 'check'

Allow the max items evaluation for checkboxes by setting the accordant 'eval' property in the field configuration in TCA.

This makes it possible to have only e.g. 5 records that have a checkbox set system-wide or PID-wide. If an editor sets a another checkbox in record #6, it gets reverted until another record was unchecked.

Parameters are "maximumRecordsChecked" and "maximumRecordsCheckedInPid".

```
$tcaFieldConf = array(
```

```
'type' => 'check',  
'eval' => 'maximumRecordsChecked',  
'validation' => array(  
  'maximumRecordsChecked' => 5  
)  
);
```
