

powermail - Bug # 5527

Status:	Resolved	Priority:	Must have
Author:	Dirk Diebel	Category:	Frontend Plugin
Created:	2009-11-27	Assigned To:	Andy Grunwald
Updated:	2010-10-21	Due date:	
TYPO3 Version:			
PHP Version:			
Has patch:			
Subject:	Mandatory Field with Value 0 is not accepted		
Description			
it's not possible to mark a field as mandatory and accept it with value 0.			
the bug is in pi1/class.tx_powermail_mandatory.php line 111, where the value is getting checked but fails because of it's logic. 0 = FALSE

I can confirm this behavior but this patch doesn't work for me.

First of all, it seems that the patch has reversed the new lines and old lines? Or maybe I'm just reading it wrong

Another thing, I had to change this line:

```
if (trim($this->sessionfields['uid'].$row['uid'])!=0){
```

To this:

```
if (trim($this->sessionfields['uid'].$row['uid'])!='0'){
```

- to make it work as expected

#2 - 2010-10-08 11:02 - Andy Grunwald

- Target version set to Powermail 1.5.6

#3 - 2010-10-21 22:26 - Andy Grunwald

- *Assigned To set to Andy Grunwald*

Fixed in r39410

#4 - 2010-10-21 22:26 - Andy Grunwald

- *Status changed from New to Resolved*
