Subject:	Backend routing failure with similar site names

Description

So I set up two sites, one named "ghulbus" and another one named "ghulbus-blackmoore". When logging into the former one's backend, Neos redirects me to http://ghulbus.eu/-blackmoore@user-[username].html instead of http://ghulbus.eu/@user-[username].html

Seems like a routing issue to me since the node paths are similar (/sites/ghulbus vs /sites/ghulbus-blackmoore)
