<b>Sprint Focus:</b>			
<b>Subject:</b>	TYPO3 breaks if docblock is removed by opcode cache		
<b>Description</b>	<p>It is possible with Zend OPcache, Zend Optimizer+ and eAccelerator to remove the docblock from the cached opcode. But this is needed for Extbase &amp; Fluid.</p> <p>What we get on install:</p> <p>PHP Fatal error: Call to a member function get() on a non-object in /home/opitz/projects/typo3-test/typo3-src/typo3/sysext/install/Classes/Controller/Action/AbstractAction.php on line 78</p> <p>We should check this separately and only in the 123 install tool before startup.</p>

[BUGFIX] Introduce failsafe view in install tool

The installer does not work, if doc comment reflection is broken, so we need to make the first install step more robust by using inject methods and introducing a failsafe view which does simple php templating in case critical errors (like doc comments disabled) occur.

Resolves: #55352

Releases: 6.2
