<b>Subject:</b>	SQL Error when choosing flexform file		
<b>Description</b>	<p>I've created a XML file (utf8, LF) and stored it within my fileadmin. Then I've chosen this file as flexform configuration file for one of my CE backend layouts. As soon as I hit the save button I'm getting the following error message:</p> <pre>exec_INSERTquery caller:      TYPO3\CMS\Core\Database\DatabaseConnection::exec_INSERTquery ERROR:      Column 'ref_table' cannot be null lastBuiltQuery:  INSERT INTO sys_refindex (tablename,recuid,field,flexpointer,softref_key,softref_id,sorting,deleted,ref_table,ref_uid,ref_string,hash) VALUES ('tx_gridelements_backend_layout','2','pi_flexform_ds_file','','',0,0,NULL,NULL,"9ff45e33a244b2c715eb11aaa97d527a') debug_backtrace:  TYPO3\CMS\Backend\Controller\EditDocumentController-&gt;processData#48 // TYPO3\CMS\Core\DataHandling\DataHandler-&gt;process_datamap#497 // TYPO3\CMS\Core\DataHandling\DataHandler-&gt;updateDB#1222 // TYPO3\CMS\Core\DataHandling\DataHandler-&gt;updateRefIndex#5808 // TYPO3\CMS\Core\Database\ReferenceIndex-&gt;updateRefIndexTable#5965 // TYPO3\CMS\Core\Database\DatabaseConnection-&gt;exec_INSERTquery#120 // TYPO3\CMS\Core\Database\DatabaseConnection-&gt;debug#206</pre> <p>I don't know if this problem is related to TYPO3 6.2beta4 or gridelements. What do you think?</p>

### History

#### #1 - 2014-02-03 23:08 - Bernhard Kraft

I experience the same problem when creating an image element from within EXT:news

#### #2 - 2014-02-03 23:56 - Gerrit Code Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/27310>

#### #3 - 2014-02-03 23:57 - Bernhard Kraft

Could you try if the supplied patch also fixes the problem when a flexform is used?

**#4 - 2014-02-04 00:11 - Gerrit Code Review**

Patch set 2 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/27310>

**#5 - 2014-02-04 08:14 - Bjoern Jacob**

Thanks Bernhard. The patch works for me. I was able to store the file. Well done :) Yesterday, I've checked out the current master and applied the patch against it.

**#6 - 2014-02-10 23:51 - Jo Hasenau**

- *Category set to General Bugs*

- *Priority changed from Should have to Won't have this time*
- *PHP Version set to 5.4*

Core problem, wont be fixed within GE

**#7 - 2014-02-16 12:04 - Gerrit Code Review**

Patch set 3 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/27310>

**#8 - 2014-02-16 18:10 - Bjoern Jacob**

So what do I have to do to get this into the core? I can't move the ticket to the core. Or should I create a new one within the core project?

**#9 - 2014-02-16 18:27 - Jo Hasenau**

As you can see, the patch is already made for Packages/TYPO3.CMS, so you just have to wait until the issues is fixed.

But of course you can test and review the patch to speed up that process. :-)

**#10 - 2014-02-26 16:42 - Gerrit Code Review**

Patch set 4 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/27310>

**#11 - 2014-02-26 18:33 - Marc Bastian Heinrichs**

Fix will be handled with issue #56353 now. Please follow over there.
