

## TYPO3.TYPO3CR - Bug # 55401

<b>Status:</b>	New	<b>Priority:</b>	Must have
<b>Author:</b>	Bernhard Schmitt	<b>Category:</b>	Query handling
<b>Created:</b>	2014-01-28	<b>Assigned To:</b>	
<b>Updated:</b>	2014-01-28	<b>Due date:</b>	
<b>Subject:</b>	NodeDataRepository returns broken QueryResult if inconsistent nodes exist		
<b>Description</b>			
<p>If nodes exist that are inconsistent in that they have invalid relations (e.g. to Media images that have been deleted) in their serialized properties, the NodeDataRepository will on findAll() return an empty QueryResult (but with the correct count() value). That makes it technically impossible to repair the nodes in a proper way.</p> <p>Version: Neos beta1 - 1.0.1</p>			

### History

#### #1 - 2014-01-28 17:47 - Bernhard Schmitt

I've traced an exception thrown when using findByIdentifier on such a node that might be involved:

Entity was not found.

Doctrine\ORM\EntityNotFoundException thrown in file

/[...]/Data/Temporary/Development/Doctrine/Proxies/\_\_CG\_\_TYPO3FlowResourceResource.php in line 32.
