Subject:	Delete file with missing processed file raises alert

Description

When a BE User deletes a File in the File Module and a
processed files is missing for some reasons as for instance
the processed file directory has been flushed,
an alert is displayed in the BE:

Could not delete file "foo.jpg". Write-permission problem?

The patch fixes the situation by adding a check whether
the file exists on the file system.

[BUGFIX] Delete file with missing processed file raises alert

When a BE User deletes a file in the file module all file references
as well as processed files are removed, too. If then aprocessed files
is missing for some reason an alert is displayed in the backend module:

Could not delete file "foo.jpg". Write-permission problem?

The patch fixes the situation by adding a check whether before deleting.

#1 - 2014-01-29 13:00 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at https://review.typo3.org/27123

#2 - 2014-01-29 13:03 - Fabien Udriot

This is quite easy to test

1. Upload a file in the File module
2. Empty all files from directory _processed_
3. Delete the uploaded file in the File module

-> a flash message error appears.

Do the same thing with the patch applied should fix the error message.
