### Associated revisions

#### Revision 75281c9c - 2014-02-24 14:30 - Alexander Schnitzler

[!!!][SECURITY] Add CSRF Protection for tce\_file.php

Add a token check in tce\_file.php and token generation everywhere forms for or links to tce\_file.php are created.

Additionally make sure, an instance of ExtendedFileUtility is created in FileController on initialization to prevent a fatal "Call to a member function on a non-object" error in FileController::finish.

Releases: 6.2

Resolves: #55515
