Sprint Focus:	

Subject:	Install tool complains about trailing slash in typo3_src link
Description	

According to http://unix.stackexchange.com/questions/1910/how-linux-handles-multiple-path-separators-home-username-file, a trailing slash in a path does not matter, so the install tool should also not complain here.

[BUGFIX] Installer rejects traling slash in link target

When having e.g. the link for ``typo3/`` pointing to
``typo3_src/typo3/``, the install tool complains because the trailing
slash is not expected. This slash is however perfectly ok, as there is
no difference between typo3_src/typo3 and typo3_src/typo3/ – both point
to the same "file" (i.e. node in the filesystem structure).

This patch strips trailing slashes from the actual link target before
doing the check, so no change to existing configuration is necessary.
