|---|---|---|---|
| **Status:** | Resolved | **Priority:** | Should have |
| **Author:** | Benjamin Mack | **Category:** | felogin |
| **Created:** | 2014-02-01 | **Assigned To:** | Benjamin Mack |
| **Updated:** | 2014-03-03 | **Due date:** | |
| **TYPO3 Version:** | 6.2 | | |
| **PHP Version:** | | | |
| **Complexity:** | | | |
| **Is Regression:** | No | | |
| **Sprint Focus:** | | | |
| **Subject:** | Frontend Login not added to PI43 anymore | | |

**Description**

As felogin has no dependency for CSS Styled Content
it registers itself via
ExtensionManagementUtility::addTypoScript()
and does not hook in after css_styled_content, because
CSS styled content itself hasn't been initialized at that
time. Thus, felogin needs to have a dependency on
css_styled_content in order to still work as before.

Additionally, some unnecessary TypoScript code
was removed / cleaned up at the same time.

How to reproduce:
Add a login CE and you'll get a yellow error
message. Apply the patch, and the form will
show up (you need to uninstall / install an
extension first in order to have the dependecy
resolving take place).

Releases: 6.2

[TASK] Make TS content templates more flexible

If an extension used static content ID 43 (content default),
it also added itself (during each runtime of ext_localconf.php)
to all available content blocks.
The original way is problematic as an extension that
provides content templates may be included after
an extension that wants to add itself after all content
templates.
This is now more confusing as the package manager
resolves the ordering of extensions and now,
CSS Styled Content gets loaded after felogin and
indexed_search.

To resolve this problem completely, the additional
TypoScript for each "contentRenderingTemplate",
a TS template that provides default content renderings,
is added to one global default TypoScript and is only

merged at the TemplateService class.

Therefore the extension loading ordering does not
matter anymore.
