

TYPO3.Flow - Bug # 55618

Status:	Resolved	Priority:	Should have
Author:	Bastian Waidelich	Category:	Error
Created:	2014-02-03	Assigned To:	Bastian Waidelich
Updated:	2014-07-11	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: (any)			
Subject:	Wrong HTTP status code for missing entities		
Description			
When an exception is thrown in <code>PropertyMapper::convert()</code> it is always wrapped in a <code>\TYPO3\Flow\Property\Exception</code> leading to the default exception handling which sets the status code of the HTTP response to 500. At least in the case of a <code>TargetNotFoundException</code> this should be a 404 status instead

[!!!][BUGFIX] Return 404 status code for removed entities

With this change the status code for persisted entities that can't be found is no longer ``500``.

Background:

When an exception is thrown in `PropertyMapper::convert()` it is always wrapped in a `\TYPO3\Flow\Property\Exception` leading to the default exception handling which sets the status code of the HTTP response to 500.

This is a breaking change only in the case that one relied on the (incorrect) behavior of returning a status code 500 for entities that couldn't be found.
