[TASK] Switch info and func module to mod dispatcher

BE modules info and func now uses mod.php.

Changing the entry script for func and info module will cause integrated submodules to fail in case they use the old entry point index.php with a relative path somewhere in funcMenu or in other links or actions.

A compatibility layer is introduced in typo3/index.php to catch those old links and redirect to mod.php with proper parameters.

#### #4 - 2014-02-06 22:16 - Anja Leichsenring

This patch introduces a breaking change for any included function wizards, in case they define own action buttons/links. The URL to call is no longer index.php, but

```
BackendUtility::getModuleUrl('web_func');
```
