Base Distribution - Story # 55816

Epic # 55813 (Closed): Access Control Lists

Status:	Closed	**Priority:**	Should have
Author:	Bastian Waidelich	**Category:**	
Created:	2014-02-09	**Assigned To:**	
Updated:	2014-03-24	**Due date:**	
Subject:	Access control for node properties		
Description			

It's currently not possible to restrict access to certain properties of nodes.

TYPO3 CMS

In TYPO3 CMS all fields of all DB tables (that have the "excludefields"-flag set) can be explicitly enabled for groups:

ACL_Allowed_excludefields.png

+ Very flexible
- low-level, hard to get right due to dependencies (e.g. property x needs property y to be whitelisted)

(to be continued)

History

#1 - 2014-02-11 20:49 - Rens Admiraal

- Has to be configured in all new projects again and again and again

- Can not easily be deployed

We need to be sure we allow for permission blue prints or a deployable way as in many cases the available fields are defined by the integrator and never changed by the 'customer'. On the other hand it should also be possible to quickly enable the field in the UI ;-)

Maybe we should also make sure that a group of properties (like visibility) can be allowed / disallowed by just using 1 checkbox

#2 - 2014-03-24 18:24 - Bastian Waidelich

- Status changed from New to Closed

Moved to https://jira.typo3.org/browse/NEOS-33
