

TYPO3.Flow - Feature # 55831

Status:	New	Priority:	Should have
Author:	Aimo Künkel	Category:	
Created:	2014-02-10	Assigned To:	
Updated:	2014-02-10	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Different scenarios for session settings		
Description			
<p>What i'd really love is something like this to easily offer some [] keep me logged in login form functionality</p> <p>TYPO3: Flow: session: # this is the default - doesn't break backwards compatibility inactivityTimeout: foo</p> <p>scenarios: myScenario1: # the user wants to be remembered # set timeout to one year inactivityTimeout: 31536000 myScenario2: # the user logged in from an internet café # set timeout to 30 minutes inactivityTimeout: 1800</p> <p>and in the controller</p> <pre>public function authenticateAction() { ... if (\$keepMeLoggedIn) { \$someObjectWhereYouWouldSetThis->setScenario('myScenario1'); } ... }</pre> <p>If the scenarios would then inherit from the default, you have everything you need to build your own configuration sets.</p>
