

## Core - Bug # 55861

<b>Status:</b>	Under Review	<b>Priority:</b>	Must have
<b>Author:</b>	Georg Ringer	<b>Category:</b>	Extbase
<b>Created:</b>	2014-02-11	<b>Assigned To:</b>	
<b>Updated:</b>	2015-06-04	<b>Due date:</b>	
<b>TYPO3 Version:</b>	6.2		
<b>PHP Version:</b>			
<b>Complexity:</b>			
<b>Is Regression:</b>	No		
<b>Sprint Focus:</b>			
<b>Subject:</b>	New PropertyMapper must accept not found arguments		
<b>Description</b>			
<p>A typical controller call looks like this</p> <pre>1 /** 2  * Single view of a news record 3  * 4  * @param Tx_News_Domain_Model_News \$news news item 5  * @param integer \$currentPage current page for optional pagination 6  * @return void 7  */ 8 public function detailAction(Tx_News_Domain_Model_News \$news = NULL, \$currentPage = 1) { 9 }</pre>			
<p>As long as no news property or a correct uid is given everything is ok but if the record can't be found, the exception Exception while property mapping at property path "":Object with identity "3" not found. is thrown.</p> <p>There is currently no way for an extension, to handle this error in the own code! It is very normal, that records get deleted, set to hidden or what so ever. Therefore it must be up to the extension if a default value is set (like NULL) to return NULL by the property mapper!</p> <p>This behaviour has been introduced with the new property mapper, disabling it makes it work fine again (which is of course no choice at all)</p>

### History

#### #1 - 2014-02-11 08:50 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/27535>

#### #2 - 2014-02-11 10:42 - Gerrit Code Review

Patch set 2 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/27535>

**#3 - 2014-05-12 18:20 - Andreas Kiessling**

Any news on this one? IMHO a breaking change with the new property mapper!  
The fix from Bastian only made it to Flow so far, but we really need this one too :/

**#4 - 2014-05-16 10:12 - Georg Ringer**

the change is not yet merged in flow.

**#5 - 2014-05-16 10:15 - Andreas Kiessling**

Ah, yes... You're right!  
I'd still prefer your patch, as it does not seem to need any new code to handle the issue.

**#6 - 2014-08-29 09:15 - Florian Schwaiger**

Is this fixed yet or do I have to merge the patch in my project manually?

**#7 - 2014-09-30 10:12 - Marc Hirdes**

I agree to Florain: Is this fixed yet or do I have to merge the patch in my project manually?

**#8 - 2014-10-20 12:00 - Marc Hirdes**

?

**#9 - 2014-10-21 15:01 - Henrik Ziegenhain**

Hi all,

nope, this Issue is not merged or fixed by another one.

The patch from above is working for my specific problem.

**#10 - 2015-04-02 13:04 - Sven Burkert**

Please fix this soon, this bug is really annoying and it applies to very much extensions.

**#11 - 2015-06-01 17:50 - Johann Carstens**

Would be nice if this could be fixed in the next 6.2.xx Version. I just ran into the same problem.

**#12 - 2015-06-03 15:39 - Klaus B**

This is a high priority issue also for us.

Is there any official status on the matter?

**#13 - 2015-06-03 15:42 - Fabian Schöner**

Im also running in this issue almost daily.

Any official status update or better a quick fix would be highly appreciated!

**#14 - 2015-06-04 17:53 - Marc Bastian Heinrichs**

*- Target version changed from 6.2.0 to next-patchlevel*

The first patch set is abandoned now.

Please test the new WIP Patch <https://review.typo3.org/#/c/39946>
