Core - Bug # 55908

Epic # 47018 (Resolved): Implement Composer support and clean package manager API

Status:	Resolved	**Priority:**	Should have
Author:	Steffen Ritter	**Category:**	
Created:	2014-02-12	**Assigned To:**	
Updated:	2015-01-26	**Due date:**	

TYPO3 Version:	6.2
PHP Version:	
Complexity:	
Is Regression:	No
Sprint Focus:	

Subject:	Package-Manager / Extension-Manager reads depencies only from ext_emconf.php

Description

When defining dependencies in the composer.json installing the extension does not install the dependent extensions since it only seems to look at ext_emconf.php

Since the depencies in composer.json are used for loading order detection, installing the extension fails with an exception (as it is not prevented, but the base extension is not loaded)

History

#1 - 2014-02-12 09:52 - Ernesto Baschny

- Parent task set to #47018

#2 - 2015-01-26 10:56 - Mathias Schreiber

- Status changed from New to Resolved

Will be tacked in 7.3 with only composer.json remaining.
