

## TYPO3.Flow - Bug # 55954

Task # 55953 (New): Repair and streamline ValueObject support

<b>Status:</b>	New	<b>Priority:</b>	Should have
<b>Author:</b>	Adrian Föder	<b>Category:</b>	
<b>Created:</b>	2014-02-13	<b>Assigned To:</b>	
<b>Updated:</b>	2015-02-05	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b> (any)			
<b>Subject:</b>	Associations to ValueObjects should not be cascade all'd		
<b>Description</b>			
<p>As it's the case for associations to entities being an aggregate root, Associations to ValueObjects must not be delete-cascaded carelessly because they are likely to and may be associated to other entities.</p> <p>This means, as far as I understand it, occurrences like</p> <pre>Packages\Framework\TYPO3.Flow\Classes\TYPO3\Flow\Persistence\Doctrine\Mapping\Driver\FlowAnnotationDriver.php:507 1 elseif (\$this-&gt;isAggregateRoot(\$mapping['targetEntity'], \$className) === FALSE) { 2   \$mapping['cascade'] = array('all'); 3 }  etc.</pre> <p>must also check for the target entity being a ValueObject.</p>
