<b>Subject:</b>	Debug "Column 'cookie' cannot be null"		
<b>Description</b>			
<p>Function writeSearchStat of SearchFormController.php triggers a debug message in FE, because \$this-&gt;fe_user-&gt;id resolves to NULL and cookie is a non-null column.</p> <p>(possibly the same will happen in SearchController.php)</p> <pre>\$insertFields = array(     'searchstring' =&gt; \$this-&gt;piVars['sword'],     'searchoptions' =&gt; serialize(array(\$this-&gt;piVars, \$sWArr, \$pt)),     'feuser_id' =&gt; (int)\$this-&gt;fe_user-&gt;user['uid'],     // fe_user id, integer     'cookie' =&gt; \$this-&gt;fe_user-&gt;id,     // cookie as set or retrieve. If people has cookies disabled this will vary all the time...     'IP' =&gt; GeneralUtility::getIndpEnv('REMOTE_ADDR'),     // Remote IP address     'hits' =&gt; (int)\$count,     // Number of hits on the search.     'tstamp' =&gt; \$GLOBALS['EXEC_TIME'] );</pre> <p>This seems to have started after 6.2.0beta3</p>

[BUGFIX] Typecast cookie value to string

The cookie might be null, therefore the INSERTquery fails in indexed\_search.

As a solution, use a type cast to string.

This is due to the patch that allowed to insert NULL values into DB.

From time to time some place popup where the insert was not constructed properly, like here.
