

TYPO3.Neos - Bug # 56042

Status:	Closed	Priority:	Should have
Author:	Tanel Põld	Category:	
Created:	2014-02-17	Assigned To:	Markus Goldbeck
Updated:	2014-10-01	Due date:	
Subject:	Case sensitive search		
Description			
Page structure and link search seem to be case sensitive. Match case could be optional.			

History

#1 - 2014-04-14 16:17 - Christian Müller

Just had a look at that and it's pretty difficult right now. Properties are stored as BLOB (that means binary for the DB). Being binary again means that LIKE queries will be case sensitive. Using a LOWER expression on the properties field and the search term isn't enough as MySQL at least would require you to CONVERT the text prior to lowercasing (and then the lowercasing is unnecessary). But CONVERT is not a function offered by Doctrine (LOWER is) so this is not an option. Changing the field type of the properties field from BLOB to TEXT works quite well in combination with LOWER, but that again is against Doctrine's "objectarray" type. We still could do this to allow this kind of queries.
