TYPO3 Version:	6.2		
PHP Version:			
Sprint Focus:			
Subject:	Implement CSRF Protection for ajax.php		
Description	<p>There is currently no API to get an AjaxURL. Following solutions should be evaluated:</p> <ol style="list-style-type: none">1. Re-Use ExtDirect Token or a similar token in top window for all ajax.php calls2. Register token check (on/off) with ajax id registration and add API to generate URI to a single Ajax ID with valid token <p>Backwards Compatibility also needs to be taken into account here, at least for third party extensions with own Ajax scripts</p>		
Subtasks:			
Task # 56345: Add API to CSRF protect Ajax calls in Backend			Resolved
Task # 56356: Protect core Ajax calls against CSRF			Resolved
Task # 56404: Make sure M parameter is first in URL			Resolved
Task # 57096: Cleanup Ajax URL JS settings			Resolved
Task # 57196: Protect Ajax calls of core extensions			Resolved
