

TYPO3.Flow - Bug # 56107

Status:	New	Priority:	Should have
Author:	Bastian Waidelich	Category:	Property
Created:	2014-02-19	Assigned To:	
Updated:	2014-02-19	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git master			
Subject:	Property mapping configuration only supports one wildcard at a time		
Description			
<p>The PropertyMapper supports wildcards (introduced with #37436) in the form:</p> <pre>1\$propertyMappingConfiguration->forProperty('items.*')->allowAllProperties();</pre>			
<p>Unfortunately this only works for one placeholder at a time. The following will never apply:</p> <pre>1\$propertyMappingConfiguration->forProperty('items.*.addons.*')->allowAllProperties();</pre>			
<p>The only work-around I can think of is:</p> <pre>1\$someArgument = \$this->request->getArgument('object'); 2\$numberOfItems = isset(\$someArgument['items']) ? count(\$someArgument['items']) : 0; 3for (\$itemIndex = 0; \$itemIndex < \$numberOfItems; \$itemIndex ++) { 4 \$propertyMappingConfiguration->forProperty('items.' . \$itemIndex . '.addons.*')->allowAllProperties(); 5}</pre>
