Advanced Frontend Editing - Bug # 56153

Status:	Closed	**Priority:**	Should have
Author:	Sebastian Stelmasik	**Category:**	
Created:	2014-02-20	**Assigned To:**	Sebastian Stelmasik
Updated:	2014-08-06	**Due date:**	

Subject:	6.2 Compatibility Changes

Description

Extension causes lots of PHP Fatal error: require_once() issues.

Tried with patch provided here:

http://forge.typo3.org/issues/45943

But it does not solve all issues - created an updated one and attached it :).

Design is still corrupted, but extension is fully functional.

Revision c52513fb - 2014-08-03 16:29 - Chris topher

[TASK] Remove require_once() calls to Core classes

Autoloader for Core classes is present since TYPO3 4.3. As far as
require_once() calls to core classes are concerned, these calls can be
removed.

History

#1 - 2014-03-26 18:00 - Chris topher

Autoloader for Core classes is present since TYPO3 4.3. As far as require_once() calls to core classes are concerned, the solution is to just remove these calls.

#2 - 2014-04-23 14:53 - Sebastian Stelmasik

- File PageRenderer.php_patch added

- Assigned To set to Sebastian Stelmasik

- Target version set to 1.7.0

- % Done changed from 0 to 90

Another error occured after updateing to 6.2.0/.1 (been using beta before) - PageRanderer lost charset/lang settings when cloned via ajax.
Updated Core-Page-Renderer (typo3/sysext/core/Classes/Page/PageRenderer.php) to fix (s. attachement). I ihink it's the same issue as here:

http://forge.typo3.org/issues/27957

#3 - 2014-05-26 15:05 - Hercules Karvasonis

- File ajax.php added

Hi Sebastian,

i tried to use the feeditadvanced extension on the latest TYPO3 6.2 and followed your instructions.
After i made the FE edit page to load i wasn't able to create new page, or new content or move an existing content.
The design was also corrupted as you mentioned above.

After digging into the code of the new TYPO3 i found out that TYPO3 is now caching all loaded ext_tables files and related conf files in typo3temp.
So, i used the "loadExtensionTables" function in "feeditadvanced/service/ajax.php" file in the initializeTSFE function right after the initializeBackendUser call.
This loaded correctly all conf files, the FE edit design is working correctly and i am able now to create new page, new content and move existing elements.

There were also a few js errors there since some js files are not included now and i fixed them also in the renderContentElement function.

I will continue digging and see if i find any other issues that need to be fixed for 6.2.

You check my code on the attached ajax.php file.

Thanks,
Hercules Karvasonis.

#4 - 2014-05-30 12:48 - Stefan Neufeind

Could somebody wrap up the patches and submit them as a review to review.typo3.org (gerrit) please?

#5 - 2014-06-14 13:04 - Sebastian Stelmasik

Hi Hercules (cool name :)),

thanks for You commit - could you please provide a patch with everything that's different from the 'original' version, as I still have probs with the FE edit design.

Best regards,

Sebastian

#6 - 2014-06-16 14:53 - Hercules Karvasonis
- File class.tx_feeditadvanced_editpanel.diff added

Hi Sebastian,

RTE is broken since there are a couple of CSS files not loaded on FE Edit with TYPO3 6.2

I have fixed the RTE issue by loading those 2 files.
You can find a diff file attached on this issue.

Thanks,
Hercules.

#7 - 2014-08-03 14:33 - Chris topher
- Target version changed from 1.7.0 to 1.6.0

#8 - 2014-08-03 16:29 - Chris topher
- File feeditadvanced_patch_6.2_v2 added
- Subject changed from 6.2 Compability Changes to 6.2 Compatibility Changes

I am currently trying to see, what changes are actually in the attached patches:

  - **feeditadvanced_patch_6.2**: Relevant from that patch is only the removal of require_once() calls in file service/ajax.php. Everything else has already been solved. New version attached. This change will be committed in https://review.typo3.org/31958/

  - The PageRenderer has been fixed with #27957. It now at least uses setCharSet() to set the charset. As for the language I am unsure - #27957 did **not** add a call to setLanguage().

To be continued with Hercules' post...

#9 - 2014-08-03 17:59 - Chris topher
- File Hercules_patch_ajax.php_v2.patch added

Attached is a cleaned-up version of Hercules' ajax.php file. I made a patch file out of it.

Also still have to deal with the design patch class.tx_feeditadvanced_editpanel, which Hercules attached above.
